November 27, 2006

To Whom It May Concern:

On November 16, 2006 the M/V Harvey Warrior underwent an inspection by BP prior to going on charter. During the audit it was noted that the engine room was exceptionally clean and in good order. It showed that a vessel of this age can be kept to a high standard. The efforts of Mr. Manson Valle should be commended for his efforts.

Captain Gillis Danos and Engineer Manson Valle were very helpful during the audit. Their attitudes towards the safety of the vessel and attention placed on here cleanliness.

Terry Duplantis
HSE Manager / Auditor
