

November 13, 2006

Steve,

Last week when I went to move ENSCO 74 we had a mechanical failure on the rig as we were leaving location. Your tow vessels, Harvey Trojan and Harvey Warrior, did an excellent job in assisting me in holding the rig on position so we could soft pin the rig and make the needed repairs.

These tugs and the spot tug, Harvey Commander, did a great job getting the rig positioned on the platform as well. Please let these men know there assistance is greatly appreciated by ENSCO and me. Looking forward to working with you in the future.

Thanks,

George Smith

ENSCO 74 Rig Manager
